UNIQUE SELLING POINT

HYBRID MODEL
Sadeeq Studio is poineering the a hybrid model that seamlessly integrates the strenghts of mobile and web3 gaming, delivering the best of both worlds while eliminating their drawbacks.

SADEEQVERSE
Our assets are more than just game characters and graphics - they are versatile elements that feature across multiple Sadeeq projects, including games, immersive lore and tokenized assets.

AUTOMATIC ELASTIC BUYBACKS
Every in-app purchase in our mobile games automatically triggers automated buyback of $SADEEQ, ensuring seamless and decentralized integration with our ecosystem.

PLAYBASED FAIRDROPS
Our rewards system is truly unique, offering players on-chain rewards seamlessly integrated with both Web2 and Web3 interactions.

HEROES OF LABYRINTH

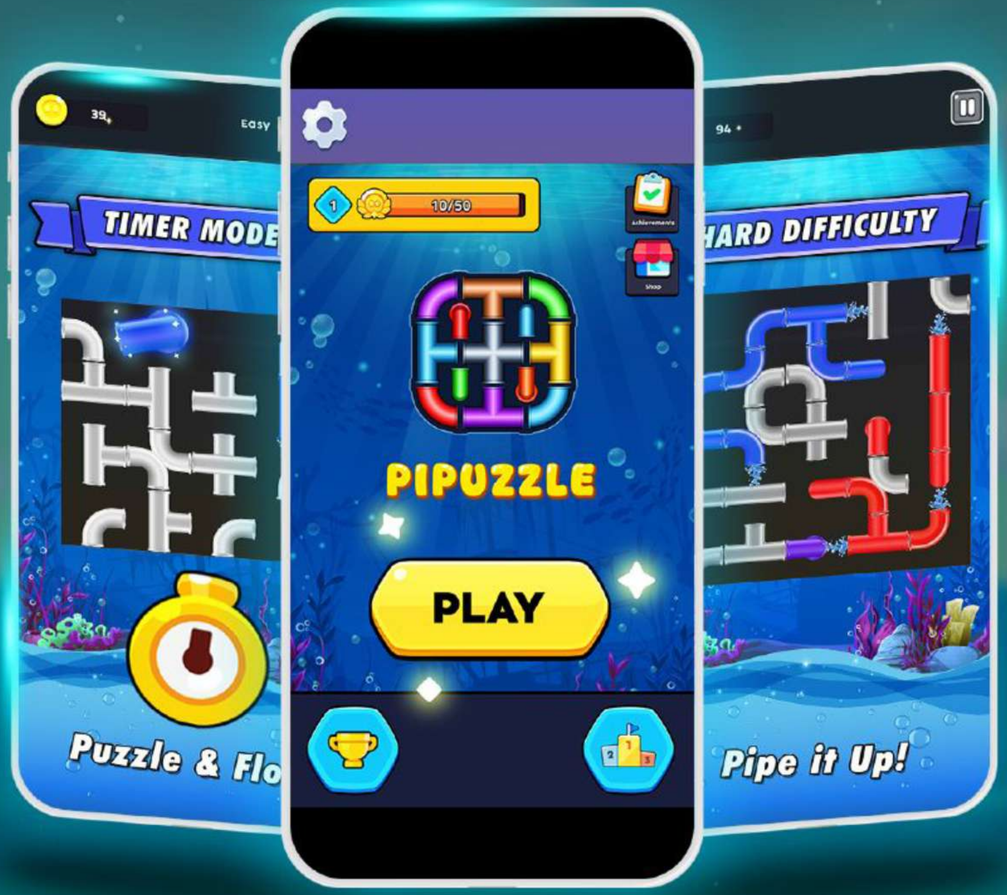
Currently in development for both Android and Ios devices, this game will feature Sadeeq Studio' very own Intellectual property characters. The game is of hyper casual genre and the objective is to find your allies in a labyrinth full of enemies and find your way through to the next level.

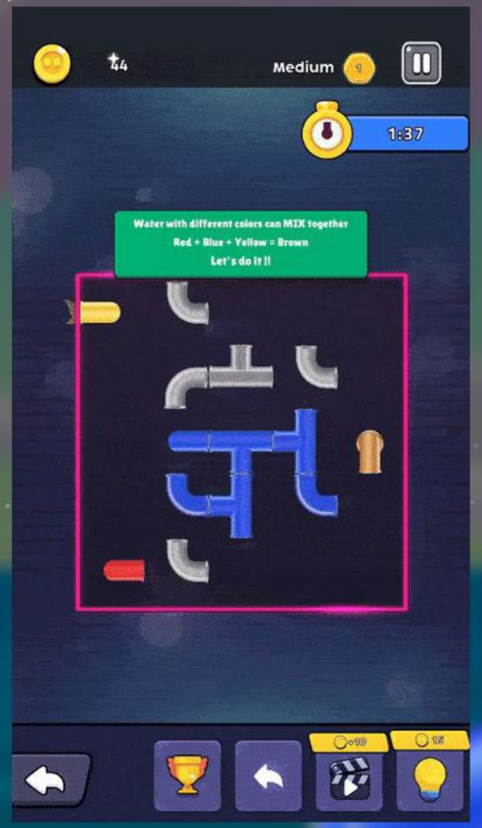
Featuring multiple game modes and lots of cosmetics and characters to choose from.

SADEEQ
STUDIOS

PIPUZZLE

Currently in development for Android and iOS, PiPuzzle is designed to captivate players with its perfect blend of relaxation and mental challenge. Featuring multiple gameplay modes, players can unwind with casual puzzles or compete for glory in timer mode to claim their spot on the global leaderboard.





SADEEQ
STUDIOS

LEADERBOARD AND MARKETPLACE

The leaderboard has daily missions, timers adnd rewards for the brave and quick players so any gladiator can rise up!

Rewards won from missions completed in a timely fashion can be staked, loaned to players in need, saved in sadeeq token credit union compounding accounts, or spent-all at the Sadeeq Marketplace!

SADEEQ DAO FOR GAME GROTH

COMMUNITY DRIVEN

Empowering the community to shape the future of gaming by actively participating in:

1. Game incubation and development strategies.
2. Community-driven marketing initiatives.
3. Defining the future of asset tokenization within the Rizze ecosystem.

SADEEQ
STUDIOS

EMPOWERING HOLDERS WITH REWARDS & AUTOMATED BUYBACKS

20% of all revenue, include game asset purchases, is reinvested into $Sadeeq tokens to strenthen the ecosystem.

Community members actively shape the ecosystem through governance via the Sadeeq DAO

Token holders earn exclusive platform rewards proportional to their $Sadeeq holdings.

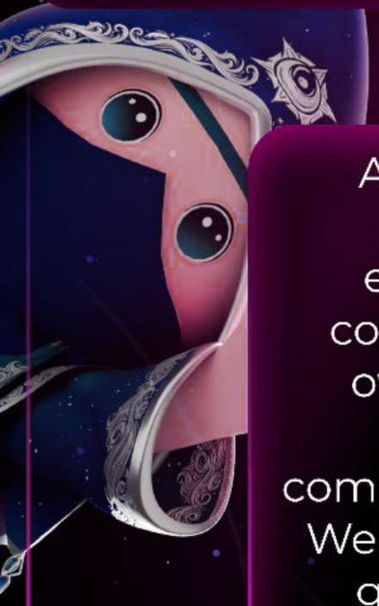
WHO ARE WE?

We are Sadeeq Studio,Registered LLC in Dubai since April 2024.

WHAT IS SADEEQ STUDIO?

We are team of passionate developers and artists dedicated to revolutionizing software development by bridging the gap between Web2 and Web3.



OUR IDEAS

An ecosystem designed to empower the community with ownership of a project that combines the best of Web2 and Web3 in games and AI.

Registered on both the App Store and Play Store, we deliver a hybrid monetization model that seamlessly integrates the strengths of Web2 and Web3 in games and AI.

The Sadeeq studio ecosystem is build on the pillars of user ownership, a community -driven reward system, asset tokenization, and an automated buyback mechanism.

SADEEQ AI DEEPFAKE PREVETION

MOBILE APPLICATION:

This application will put a encryption on feature used by Deepfake and similar tools while maintaining overall visual of the user's picture and videos, Encrypting the media from being used as deepfake's or a similar AI tool while also restricting the media to be used a part of data set to train a similar model.

ENCRYPTION:

Sadeeq studio focuses on bridging gap between web2 and web3, the encryption key will be saved in both mobile application as well as a token in user's web3 wallet adress.

Beta application with base AI model is live now

THE FOUNDRY: AI-POWERED 2D-TO-3D MODELS

The Foundry leverages cutting-edge diffusion models to transfer 2D images into high-fidelity 3D assets without requiring requiring traditional multi-view training datasets.

This approach buids upon NeRFS (Neural Radiance Fields) and state-of-the-art text-to-imagediffusion medels to synthesize detailed 3D objects from single 2D inputs.

SADEEQ
STUDIOS

CORE TECHNOLOGY:

DIFFUSION MODELS:

- Uses a pretrained 2D image generator to guide 3D object synthesis.

SCORE DISTILLATION SAMPLING (SDS):

- Optimizes 3D structures by refining NeRFs based on 2D model feedback.

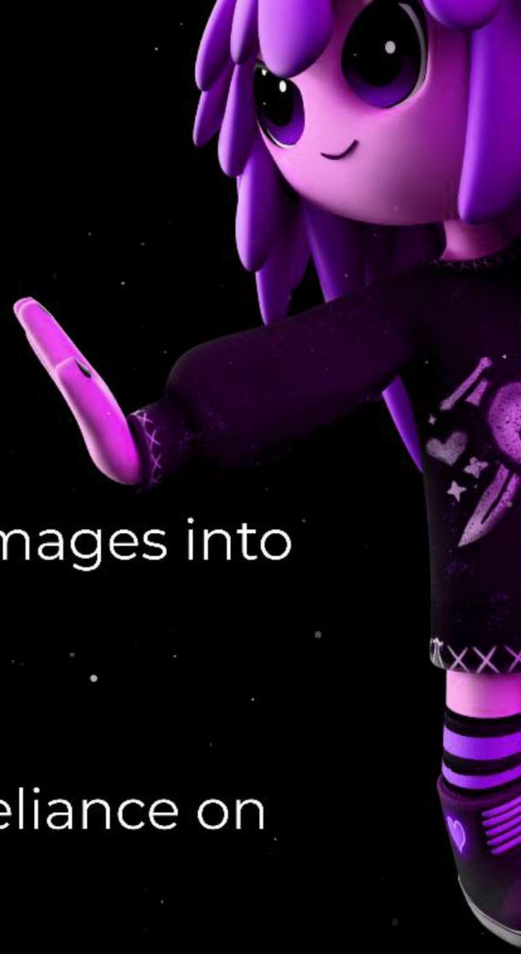
VIEW CONSISTENCY:

- Generates coherent textures and lighting across all angles without requiring multi-view datasets.

NO DATASET DEPENDENCY:

- Unlike traditional 3D modeling, this method eliminates the need for massive labeled 3D datasets.

SADEEQ
STUDIOS



KEY ADVANTAGES:

- AI-Powered Automation: Turns sketches, concept art, and single images into fully realized 3D game assets.
- Efficiency & Scalability: Enables rapid asset generation, reducing reliance on manual 3D modeling.
- Seamless Integration: Outputs can be used in gaming engines (Unreal Engine, Unity) and 3D applications.

OUR PROJECTS

DEEPFAKE ENCRYPTION

Sadeeq studio is working on a state of the artapplication that will allow the user to encrypt their media files to protect from the deepfakes, this encryption can be saved via in-app web2 key as well as a web3 token in a secure wallet.

FOUNDRY

The Foundry is a game changing tool allowing users and game developers to quickly generate game-ready 3D models from 2D images. Game studios and hobbyists alike are able to cut down on development time and generate hundreds of in-game assets in minutes!

HYBRID GAMES

A unified ecosystem that bridges Web3 and mobile games, giving players meaningful ownership across platforms. The games will be on multiple platforms (Android, IOs, PC)

SADEEQ
STUDIOS

SOLVING PAIN POINTS IN MEDIA PRIVACY

AVAILABILITY

Anything we share on social media is easily downloadable and editable to be used in either deepfakes edit or being used to train similar models

MISINFORMATION

Deepfakes edits have become so accurate that it becomes difficult to distinguish between the real and fake ones.

FINANCIAL VULNERABILITY

In many cases these deepfake edits push people to make financial decisions that results in huge losses.

NO WAY OF SECURING MEDIA

There is a complete unavailability of solution that lets user shares media files on social platform will encrypting it to save it from deepfake edits or Machine Learning Algorithms

SADEEQ
STUDIOS

SOLVING PAIN POINTS IN GAMING

WEB3 GAP IN GAMES

The majority of the $90Bn mobile gaming market is unaware of what decentralization and true game ownership is.

NO PLAYER BENEFITS

Current models burden players with in-app purchases and intrusive ads, offering little to no real value.

ECO-SYSTEM

A unified ecosystem that bridges Web3 and mobile games, giving players meaningful ownership across platforms.

AD FREE EXPERIENCE

A tokenized gaming model that eliminates intrusive ads, empowering players with ownership while enhancing gameplay.

SADEEQ STUDIO GAMEVERSE

MULTI-PLATFORM GAMES: Sadeeq studio has multiple games on Apple TestFlight and in Android beta, games will be available to all on the Apple App Store, the Google Play Store, and Epic Store.

SADEEQSTUDIO: Game assets, features, profiles, AI integrations, and AI services are seemlessly integrated for enhanced player experience and community engagement!

PROGRESS: Mobile games deployed to Apple and Google platforms, AA multiplayer game in beta with release date for Epic, and the base AI model is reporting 100% prevention rate from deepfake edits.

SADEEQ

TOKENIZATION

STORIED PAST : Sadeeq Studio has been developing games for the App Store and PlayStore for a year.

AN ECOSYSTEM FOR EVERYONE

WEB2 GAMERS: Sadeeq Studio operates like any in-game currency supporting the marketplace without any additional learning curve.

WEB3 GAMES: Utilize $SADEEQ powered staking, rewards, leaderboard incemtives to maximize performance and returns.

INVESTORS: The tokenomics and deflationary curve of $SADEEQ is optimized for usage and price appreciation.
